
Sustainability policy

At BPC Instruments, sustainability is deeply ingrained in our ethos. Guided by our mission to contribute to a sustainable future, we take a leadership role in developing and delivering analytical instruments that enable efficient and reliable data generation for bioanalysis in renewable bioenergy and environmental analyses. Our commitment to sustainability aligns with our core values, shaping every aspect of our operations.

Innovation

Innovation is at the heart of what we do. We continually strive to pioneer new solutions that push the boundaries of sustainability. From supporting renewable bioenergy source like biogas and biohydrogen to conducting thorough environmental analyses, including assessing the biodegradability of new polymer materials and evaluating animal feed digestibility, we are dedicated to driving positive change.

Inclusion

Inclusion is fundamental to our success. We embrace diversity and foster an inclusive workspace where every voice is heard and valued. By encouraging diverse perspectives, we enhance our ability to innovate and address complex sustainability challenges effectively.

Passion

Passion drives us forward. It is our unwavering passion for innovation and sustainability that fuels our commitment to making a difference. We understand the profound impact our work can have on the world, and we are dedicated to creating a more sustainable future for generations to come.

Sustainability

Sustainability is not just a buzzword for us, it is a way of life. We go beyond rhetoric, taking tangible actions to minimize our environmental footprint and maximize our positive impact. From investing in innovative solutions to upholding stringent quality standards and prioritizing customer satisfaction, sustainability is at the heart of everything we do.

Transparency and Accountability

Transparency and accountability are foundational to our approach. We are committed to being honest and forthright in our actions and building trust with our stakeholders. By fostering a genuine culture of sustainability within our organization and beyond, we are working together to create a brighter, greener future for all.

Sustainability Framework

At BPC Instruments, our commitment to environmental and social responsibility is ingrained in the fabric of our innovation and production development processes. This commitment shapes our business operations and influences how we interact with our stakeholders. We are dedicated to making a tangible difference in creating a greener, more environmentally conscious world, ensuring that sustainability is not just a goal but a fundamental principle driving our business forward.

Advancing with Sustainable Solutions

Our commitment to environmental and social responsibility influences our interactions with customers, suppliers, and colleagues, shaping our business operations every step of the way. We are determined to advance analytical tools that enhance efficiency, reliability, and quality, focusing on sectors such renewable energy, biodegradable materials, wastewater treatment, animal feed, and environmental bioanalysis. This alignment with global trends in sustainable business development reflects our commitment to a sustainable future.

Our Commitment to Sustainable Development

BPC's journey towards Sustainable Development Goals (SDGs) commenced in 2022, with staff contributions during Q2-Q3 2023. This marked the beginning of our commitment to sustainable development. Our dedication to sustainability aligns with four key SDGs from Agenda 2030:

SDG 6.3: Enhancing water quality, advancing wastewater treatment, and promoting safe reuse.

SDG 8.4: Enhancing resource efficiency in consumption and production practices.

SDG 9.5: Augmenting research efforts and elevating industrial technologies.

SDG 17.17: Encouraging the establishment of effective partnerships.

By adhering to these goals, we aim to make a positive impact not only within our company but also on a broader scale of environmental stewardship and sustainable global development. Our commitment extends to providing solutions where our customers, with the assistance of BPC's analytical equipment, can streamline and simplify their laboratory analyses, reducing labor intensity and time consumption. This provides competitive solutions meeting the increasing demand for bioanalysis, ultimately fostering a more efficient and profitable business operation while promoting a healthier and more sustainable world.

ESG principles

Environmental Sustainability

At BPC Instruments, our business development efforts are closely aligned with our expertise in renewable energy, environmental analysis, and biotechnology innovation. Our commitment to sustainability is woven into the fabric of our operations, driving us to create products that not only enhance our customers operational efficiency and data quality but also have a positive impact on the environment. Our core focus on renewable bioenergy production, plastic waste reduction, and carbon footprint reduction underscores our commitment to environmental sustainability.

As an innovative company dedicated to analytical technologies, we prioritize serving academic and industrial sectors essential for advancing sustainability.

Through collaborative initiatives, we embrace inclusivity and forward-thinking to drive technology and business collaboration, from product distribution to exploring new opportunities.

Our instruments for feedstock quality control contribute significantly to biomethane or biogas production, promoting cleaner and more efficient energy while reducing greenhouse gas emissions. Additionally, our role in analyzing biodegradable plastics drives the development of eco-friendly materials, reducing environmental waste.

Social Responsibility

Our commitment to social responsibility is integral to our core business in renewable energy and environmental biotechnology, influencing both our operations and the communities we serve.

Community Engagement: We actively partner with clients and collaborators to address environmental challenges and foster a harmonious relationship between people and the environment through community initiatives.

Climate Advocacy: Leveraging our expertise, we advocate for eco-friendly policies and practices, engaging with clients, partners, industry associations, and environmental groups to drive sustainability on a broader scale.

Employee Empowerment: We empower our employees to make sustainable choices, fostering a culture of environmental and social awareness. They are encouraged to contribute ideas for improving our organization and are directly involved in enhancing our products, services, and operations.

Reducing Our Footprint: We minimize our environmental impact by developing innovative products with lower energy consumption and exploring opportunities to use environmentally friendly materials in both product production and logistics.

In summary, our social responsibility aligns with our core business. Through community engagement, advocacy, employee empowerment, and responsible operations, we are dedicated to creating a more sustainable and harmonious future.

Governance for Trust and Honesty

At BPC Instruments, we prioritize strong governance practices to build trust and honesty in all our relationships. Transparency is key, allowing our clients, shareholders, board directors, company management, and staff to trust in our operations. We achieve this through annual customer surveys, effective communication with shareholder representatives, and open dialogue among management, board directors, and staff.

We adhere to the highest ethical standards in our company management, ensuring integrity and accountability at every level of our organization. Inclusivity is fundamental to our operations, fostering a culture of openness and trust within our workforce.

Our governance framework is guided by a long-term vision, prioritizing the interests of all stakeholders. This approach underscores our commitment to fostering enduring relationships built on trust, honesty, and sustainability.

As we navigate the complexities of environmental, social, and governance responsibilities, our governance practices remain steadfast. They reinforce our dedication to transparency, trust, and honesty in all our endeavors.

Incorporating above ESG principles into our business practices ensures that we operate in a manner that is environmentally responsible, socially inclusive, and ethically sound. From contributing reduction of carbon footprint and promoting diversity and inclusion in the workplace to upholding high standards of corporate governance and transparency, we prioritize ESG considerations in everything we do. By integrating sustainability, SDGs and ESG principles into our business strategy, we strive to create value not only for our company but also for our stakeholders and the broader community. We believe that by embracing sustainability in all its dimensions, we can build a more resilient and prosperous future for generation to come.

Excellence is built on precision and accuracy

BPC Instruments is a global Swedish-based technology company developing and offering analytical instruments enabling more efficient, reliable, and high quality of research and analysis for industries in renewable bioenergy and environmental biotechnology. The result is not only higher accuracy and precision, but also significant reduction in time consumption and labour requirement for performing analyses. BPC Instruments' innovative products offer high-quality hardware and software based on deep knowledge and experience of target applications. The solutions are the first of their kind, making the company a pioneer in its field. Today, BPC Instruments exports to nearly 70 countries around the world.
